

AMENDMENT

Listing of Claims

Please amend the claims as follows:

1. (Currently Amended) An audio assisted computer setup apparatus, comprising:
 - a processor;
 - a memory operatively connected to the processor, the memory containing audio file instructions for setting up a computer system;
 - a photo diode operatively connected to the processor, the photo diode for receiving light;
 - a speaker connected to the processor; and
 - a set of controls for controlling the operation of the audio file instructions;
 - wherein the setup apparatus is activated upon a triggering event the photo diode being exposed to a predetermined level of light before the computer system is set up.
2. (Original) The apparatus of claim 1, wherein the speaker is a piezoelectric speaker.
3. (Original) The apparatus of claim 1, wherein the controls comprise a selection consisting essentially of back, next, repeat, restart, more, language select and speed select options.
4. (Original) The apparatus of claim 1, wherein the set of controls further comprises a display which displays an instruction number and instruction label for the audio instruction being presented by the audio assisted setup apparatus.
5. (Canceled)
6. (Original) The apparatus of claim 1, wherein the apparatus is affixed to a computer component.

7. (Original) The apparatus of claim 1, wherein the apparatus is affixed to a packing container of a computer system.

8. (Original) The apparatus of claim 1, and further comprising:
a mailing flap which folds over the apparatus to allow the apparatus to be mailed.

9. (Currently Amended) A packing container for a computer system, comprising:
a container capable of holding computer system components; and
an audio assisted setup apparatus affixed to the container, the apparatus being activated upon the impingement of a predetermined level of incident light upon the apparatus, to the audio assisted setup apparatus provideing audio startup instructions to assist a user in setting up a computer system.

10. (Currently Amended) A computer system, comprising:
a computer; and
an audio assisted setup apparatus affixed to a component of the computer, the apparatus activated to provide audio startup instructions to assist a user in setting the system up. the audio assisted setup apparatus, comprising:

a processor;
a memory operatively connected to the processor, the memory containing audio file instructions for setting up a computer system;
a photo diode operatively connected to the processor, the photo diode for receiving light;
a speaker connected to the processor; and
a set of controls for controlling the operation of the audio file instructions[.]],

wherein the audio assisted setup apparatus is activated upon the photo diode being exposed to a predetermined level of light, the activation of the audio assisted setup apparatus for providing audio startup instructions to assist a user in setting the system up.

11. (Canceled)

12. (Currently Amended) The apparatus of claim ~~11~~ 10, wherein the speaker is a piezoelectric speaker.

13. (Currently Amended) The apparatus of claim ~~11~~ 10, wherein the controls comprise a selection consisting essentially of back, next, repeat, restart, more, language select and speed select options.

14. (Currently Amended) The apparatus of claim ~~11~~ 10, wherein the set of controls further comprises a display which displays an instruction number and instruction label for the audio instruction being presented by the audio assisted setup apparatus.

15. (Canceled)

16. (Currently Amended) A method of assisting a user in set up of a computer system, comprising:

providing a self-contained apparatus containing a set of audio instructions presentable to the user upon actuation of the apparatus;

activating the apparatus upon the occurrence of ~~a triggering event an impingement of a predetermined level of light on the apparatus~~; and

allowing the user to control the presentation of audio instructions.

17. (Canceled)

18. (Original) The method of claim 16, and further comprising:

providing additional instructions if the user desires additional instructions.

19. (Original) The method of claim 16, and further comprising:

allowing the user to repeat an instruction.

20. (Original) The method of claim 16, and further comprising:
allowing the user to adjust the speed of presentation of the audio instructions.
21. (Original) The method of claim 16, allowing the user to restart the audio instructions from the beginning.
22. (Original) The method of claim 16, and further comprising:
displaying a legend indicating the instruction number and label corresponding to printed instructions.
23. (Currently Amended) A machine readable medium comprising machine executable instruction for causing a processor to perform a method comprising:
providing a user a set of audio instructions for setting up a computer system; and
activating the set of audio instructions upon the impingement of a predetermined level of light upon a photo diode operatively connected to the processor.
24. (Original) The machine readable medium of claim 23, wherein the method further comprises:
providing additional instructions if the user desires additional instructions.
25. (Original) The method of claim 23, and further comprising:
allowing the user to repeat an instruction.
26. (Original) The method of claim 23, and further comprising:
allowing the user to adjust the speed of presentation of the audio instructions.
27. (Original) The method of claim 23, allowing the user to restart the audio instructions from the beginning.
28. (Original) The method of claim 23, and further comprising:

displaying a legend indicating the instruction number and label corresponding to printed instructions.

29. (Previously Presented) The packing container for a computer system of claim 9, wherein the apparatus is configured to be activated in response to the packing container being opened.

30. (Previously Presented) The computer system of claim 10, wherein the apparatus is configured to be activated in response to a packing container for the computer system being opened.

31. (Previously Presented) The method of claim 16, wherein the set of audio instructions are instructions for setting up the computer system.

32. (Previously Presented) An audio assisted computer setup apparatus, comprising:

a processor;

a memory operatively connected to the processor, the memory containing audio file instructions for setting up a computer system;

a speaker connected to the processor;

a set of controls for controlling the operation of the audio file instructions; and

a mailing flap which folds over the apparatus to allow the apparatus to be mailed,

wherein the setup apparatus is activated upon a triggering event before the computer system is set up.

33. (New) The apparatus of claim 32, further comprising a photo diode for receiving light.

34. (New) The apparatus of claim 33, wherein the photo diode activates the apparatus when a predetermined level of light is incident upon the photo diode.

Appl. No. 09/409,500

Reply to: Office Action Dated June 9, 2004

Title: AUDIO ASSISTED SETUP APPARATUS AND METHOD

35. (New) The apparatus of claim 32, wherein the opening of the mailing flap activates the apparatus.
